Creating a Profile:
The Profile Creation Wizard will lead you through creating your user profile. Proceed to the next steps by selecting **Next** in the bottom right corner.

The Wizard will ask you a series of questions including:

- Your name
- Age
- Region in the world in which you reside
- If you have an accent (if you don't know your accent, select **Standard** and Dragon will be able to figure it out the more you talk-- (to increase accuracy, run **Acoustic Optimization**)
- And what type of microphone you are using.

Review your information, and select **OK** so save your selections. Select the **Create** button to create your user profile.
Training Dragon To Recognize Your Voice:

When you see the Read Text Aloud to Train Dragon page, you can choose from three options.

1. The first option is to Show Text With Prompting. With this, a yellow arrow will show you where to start reading. Select Go to begin reading, and select pause if you need to take any breaks.

2. The Second option is Show Text Without Prompting. Here, you can choose a text to read, and select Next. You may then choose whether you want to read from the screen, or from a printed page. If you choose to print, Select Print to print the text, and then select Next. If you choose to read from the computer, it will ask you to position your microphone, and then you may select Train to begin. In the Speaking to the Computer pop up, select Begin Training and read the text in the box. Select Next to move from page to page.

3. The last option is to Skip Training, which is not recommend.

To train Dragon to recognize you voice, you only need to read for about 5 minutes. You will have a progress bar to show you how much text is left to read.

When you've read enough, the Training Wizard will show a Congratulations message. Select OK and Dragon will start adapting to your voice.

TIP:

Remember to click in the window you want to talk to before you speak.
