Rochester Area School of Nursing  
Management of Clinical Incidents

When an event (accident, injury) occurs in the clinical setting, it is important that clinical instructors have accurate information to assist students in seeking appropriate care. An incident report for the agency/hospital needs to be completed and immediate communication with the faculty at the school of nursing initiated.

To assist clinical instructors, the following grid details the appropriate steps and resources to assist students seeking care at the Rochester area clinical agencies.

<table>
<thead>
<tr>
<th>Agency</th>
<th>Event</th>
<th>Agency Incident Report Yes/No</th>
<th>Immediate Care for Student e.g. ED, Employee Health, Student PCP</th>
<th>Follow Up Care &amp; Communication e.g. ED, Employee Health, Student PCP</th>
</tr>
