Weeding has been completed in nursing pharmacology, finishing our first 3 year cycle of reviewing all of the nursing books and films.

New titles added include:

**Clinical Drug Therapy: Rationales for Nursing Practice**

**Facts & Comparisons:** Includes Formulary Monograph Service that delivers detailed information about recently released and investigational drugs including

**Micromedex:** Includes access to *Martindale: The Complete Drug Reference* and *The Red Book* which includes pricing information. Also hazardous chemicals and poison information for commercial products.

**Lexi-Comp Online:** Has a special add on feature of “Nursing Implications.” If there are special directions or information for nurses, it is listed in a section called Nursing Implications. Not all entries for have this extra nursing information.

**ARTICLE DATABASES**

In addition to PubMed@Fisher, there are two databases specifically for pharmacology literature.

**IDIS:** is the Iowa Drug Information Service. Only one person may access this resource at any one time. Please click on “Log Off” when you are done searching.

**International Pharmaceutical Abstracts (IPA):** Pharmaceutical science and health related literature, IPA contains over 350,000 records from 1970 through the present.
