We have added Web of Science to our Database collection and with it came EndNote Web. Endnote Web is a web-based version of the popular Endnote software used for citation management.

Access Endnote Web through the Lavery Library Homepage > Cite a Source.

Endnote Web works seamlessly with Web of Science and Ebscohost databases like CINAHL, Nursing Reference Center and Academic Search Complete.

APA Citation Style

NEW 6TH EDITION
The new Publication Manual of the American Psychological Association has been out since the summer of 2010. There are copies available at the Library in the Reference Collection as well as on the Upper Level.

Even with the new manual there are things they still need clarification. APA runs an official blog that answers frequent questions and provides extra examples not found in the manual.

DATABASE GENERATED CITATIONS
Many databases now have a citation generator feature, either as a button or as part of the email feature. However, I have yet to see a database get the citation 100% correct.

DOI
Many articles are now assigned a DOI at the point of publication. It is a unique string of numbers and letters that represents a single article, like a social security number for an article.

An example from a 2011 Critical Care Nurse article.

10.4037/ccn2011463

Not sure how and when to include the DOI in a citation? This flowchart helps with DOIs, URLs and database names.

USE THE DOI TO FIND FULL TEXT
Have a DOI? Use the library’s Find Journals page to find full text.
DATABASE HIGHLIGHT

UpToDate

Topics Viewed by Specialty and Features Accessed

We recognize that it’s important for you to be informed about which types of topics are viewed most often by your clinicians. This will allow you to see what UpToDate content your clinicians access most, regardless of their specialty. The charts below are based on the same 12-month time period as the usage graph above.

Integration with Lexi-Comp
Includes Lexi-Comp Drugs Online and Pediatric information – including Nursing Implications. However, it does not include the separate Geriatric Drugs Online module that is available in Lexi-Comp Online.

Full Text of References
Click on a citation in the Reference list and then click on “Check for Full Text availability” to connect to Fisher Full Text and Interlibrary Loan.

The Deputy Editor for a specialty, as well as the Editor-in-Chief and/or Section Editors assigned to a topic, review all UpToDate content, including new topics, updates and recommendations. In addition, each UpToDate specialty has assembled a group of peer reviewers, often in conjunction with a sponsoring specialty society, who are responsible for reviewing selected topics in each specialty. Finally, any comments from users of UpToDate are formally addressed, with changes and/or additions incorporated as necessary.

Each topic has an author who is an expert in the area discussed, and at least two separate physician reviewers. This group works together to perform a comprehensive review of the literature and carefully select studies for presentation based on the quality of the study, the hierarchy of evidence discussed above, and clinical relevance. This group of paid and unpaid experts write the UpToDate entry.

*chart reflect total usage at St. John Fisher College by all departments combined
